How to: Manage Your Benefits

WeCare® Online Benefit Administration System

91%

**of employers are asking their employees
to do more work with less resources.***

And Benefit Managers are feeling the pressure.

WeCare® helps you manage your benefits by delivering a powerful system that handles your enrollments, transactions, and connections. A flexible, customized system that will reduce your costs without compromising quality or consistency.

Our goal is to help you increase benefit administration productivity and efficiency - no matter what constraints or pressures you are under.

WeCareWorks

What WeCare® Will Do For You

Enrolls All Your Benefits

WeCare enrolls any number of covered lives – plus all types, and any amount of benefits. We also specialize in improving employee participation in supplemental insurance plans.

Handles Day-to-Day Transactions

Use WeCare to manage the day-to-day tasks of administering your benefits. You can easily perform ongoing transactions like life events, eligibility changes, additions, terminations, census changes, and more.

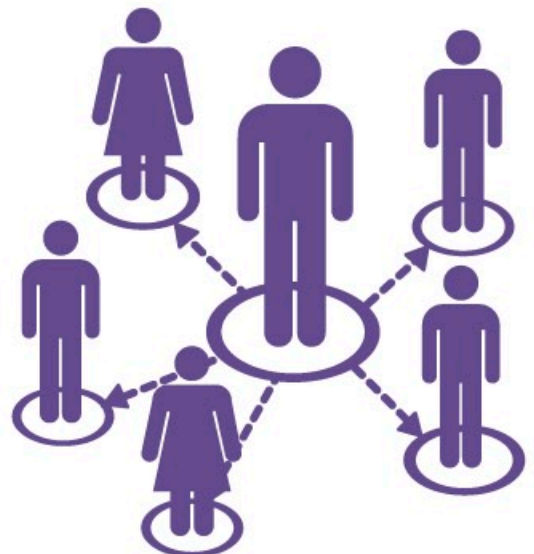

Gives You Gatekeeper Control

Most clients choose our WeCare Gatekeeper Option to manage and control employee requests for benefit updates. Benefit managers review and approve requests before releasing them for processing.

Supports Any Enrollment Method

WeCare works for face-to-face interviews, employee self-service, and call center enrollments with ease. Plus, you can use it for annual enrollments and new hire onboarding year-round.

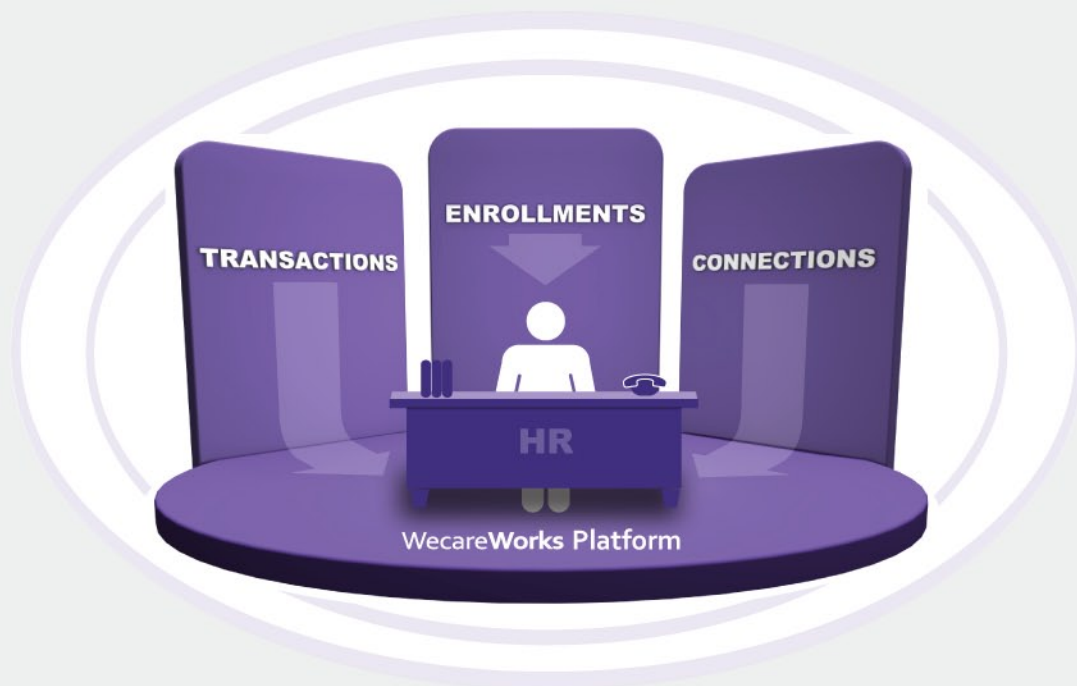

Connects Electronically to Carriers

WeCare provides direct electronic links to your payroll system and insurance carriers. The system is carrier-independent, and can accommodate standard or custom eligibility files.

The WeCare® Online Benefit Administration System

WeCare is a secure, comprehensive, web-based solution for the enrollment, administration, and management of employee benefits. WeCare gives you the ability to perform 3 critical benefit functions.

Enrollments. WeCare enrolls all your benefits, and supports any type of enrollment method. You can use it for annual open enrollment, and new hire onboarding year-round.

Transactions. WeCare handles the day-to-day tasks of administering your benefits. That means managing ongoing transactions like life events, eligibility changes, terminations, census changes, and more.

Connections. WeCare provides Electronic Data Interchange (EDI) – the synchronized, secure, and seamless electronic transfer of employee and benefit data to your payroll system and insurance carriers.

Why WeCare® Will Work for You

We Build the System for You

Unlike other providers, we build the WeCare system for you. You do not have to attend vendor school. Or follow set-up wizards. Or buy extra hardware or software. Or hire an implementation firm. We do it all.

We Customize the System to Meet Your Needs

We customize WeCare with your eligibility rules, benefit plans, rate structures, and other specific requirements. It's not off-the-shelf technology. It's flexible, adaptable, and versatile.

We Integrate the System into Your Workflow

Your workflow processes drive your day-to-day benefit operations. We will take the time to understand how you work. Then we adapt and integrate WeCare into your existing processes to optimize results.

We Deliver High-Impact Service

We will learn your goals, processes, and requirements. And we will bring the maturity, flexibility, knowledge, and commitment to ensure that you are satisfied with your WeCare system.

We Offer a High-Value, Low-Cost System

In side-by-side comparisons, employers rank WeCare as a high-value, high-quality, low-cost system. Further, by offering supplemental insurance plans employers may achieve even more favorable package pricing.
